Be sure, ride Sure!

- Robust e-bikes that are designed in NL and Built in Europe
- Crafted especially for rental / business transport
- Sustainable engineering
- High quality on service and materials
- Low maintenance, hassle fee, the perfect ride

Be sure, ride Sure!

- Simple and intuitive design
- Moves your customers and employees safely
- Always ready for rental and sharing
- Tough materials make it a lasting experience

The new generation e-bike made for business mobility.

- **Fool proof**
- **Sharing enabled**
- **Rental robust**

The SURE E-bike is designed and developed by entrepreneurs with years of experience in the rental industry. They noticed there was no fool proof E-bike on the market that fits the specific needs of rental companies.

Due to misuse and vandalism, the regular bicycles used for rentals need lots of maintenance. We truly understand riders and business owner's needs.

Through on-the-ground research, data trend analysis, interviews, and our own personal experience, we got to truly understand riders and business owner's needs.

The need is a robust, comfy, time-efficient and sustainable E-bike.

That is SURE E-bike

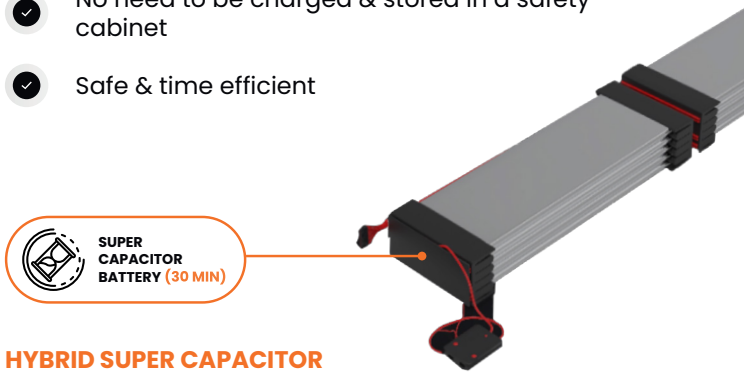
Be sure, ride Sure!

Be sure, ride Sure!

- **100% puncture proof**
- **Less maintance**
- **Great ride experience**

Thanks to the patented airless tire system your customers move without flat tires. 100% Puncture proof, durable and indestructible!

- 20 year lifespan without capacity loss
- More than 10.000 charge cycles without any problems
- Weather conditions do not affect the charging capacity and power
- The supercapacitor can withstand a major impact, and also survives a fall
- No need to be charged & stored in a safety cabinet
- Safe & time efficient



HYBRID SUPER CAPACITOR

Formula 1 technology in the e-bike: hybrid super capacitor as a sustainable lithium(-ion) alternative. The SURE Bike is equipped with the fastest charging battery technology, also adopted by Tesla! Only 30 minutes to a full charge ensures you to optimize your rental capacity. And the battery will last too.

The SURE Bike is equipped with a powerful and efficient Bafang M410 mid motor designed for multi-terrain bikes. The best drive system that gives perfect ergonomic support. Ensure a comfortable ride in harsh environments like steep hills, deep mud, sand or snow.

Be sure, ride Sure!

ALUMINIUM DESIGN RIMS

Rims are a critical component of the bike wheel. High-end wheels are lighter, stiffer, more aerodynamic and durable. The aluminium design wheels are designed to absorb shocks and vibrations. Due to their durability the rims can whitstand high impact, are more reliable and less likely to break. Avoid bucket wheels!

ONE CLICK ADJUSTABLE SEAT

The SURE e-bike is produced in one size with a comfortable and adjustabble gel bike seat. Customers can easily set their seat height with the integrated one click handle under the seat.
